

PROFILE

Systems Analyst with experience in web development, server administration, and UI design. Graduate of the **AWS Re/Start 2026** program, **AWS Certified Cloud Practitioner**, with **VecinoClub**, a serverless loyalty platform in production. Active self-learner, advanced English (TOEFL 101/120), results-oriented.

EXPERIENCE

VecinoClub

In production · Chile

Design & Development

- Loyalty SaaS platform for local businesses: customers scan a QR code to check stamps and points without installing an app; each business sets benefits, records purchases, and views statistics.
- Designed and deployed its multi-tenant serverless architecture: Lambda, API Gateway, DynamoDB, Cognito, CloudFront, S3, and SES; backend in FastAPI/Python and frontend in React 19 with TypeScript.
- CI/CD with GitHub Actions and AWS SAM, with a manual gate before production.

Imaquinaria Estudio / Tienda SPA

2016 – present · Temuco

Co-founder · Development & Operations

- VecinoClub's first business and proving ground.
- Design and development of the Bushidō program.
- Brand identity management, content production, and sales channel oversight.

Cuarto Mundo

2014 – present · Chile

Co-founder · Web Administrator & Editor

- Administration and customization of a WordPress platform for a pop culture digital publication.
- Editorial management and content production since founding.

Lazos S.A.

2014 – 2015 · Temuco

Web Server Administrator

- Server administration and feature implementation for clients.
- Replicated CONAF's navigation and intranet for an internal migration project.

iClub S.A.

2011 – 2012 · Temuco

UI Designer · Web Developer

- UI design for an Android restaurant ordering app.
- Corporate website development.

FEATURED PROJECT

VecinoClub

Serverless loyalty platform for local businesses in Chile — in production.

Backend: FastAPI / Python on AWS Lambda

Frontend: React 19 + TypeScript

AWS Services: Lambda · API Gateway · DynamoDB · Cognito · CloudFront · S3 · SES · CloudWatch

DevOps: GitHub Actions CI/CD · AWS SAM

Architecture: Multi-tenant, serverless

EDUCATION

Amazon Web Services

AWS Re/Start — Graduate 2026

Temuco, Chile

Intensive cloud computing program. Official badge. AWS Certified Cloud Practitioner.

Instituto Santo Tomás

Systems Analyst Programmer

2011 – 2015 · Temuco

Software development, MySQL databases, networking, and systems administration.

Temuco Lab · 2025

Learn Python From Scratch

Programming logic, Python syntax, Google Colab, pandas library.

Temuco Lab · 2025

PrintLab: Innovating in 3D

Cloud-based modeling in Onshape, 3D printing, Cura Slicer.
